A COMMITMENT  
TO PEOPLE, EFFICIENCY,  
AND QUALITY

## EDG'S QUALITY MANAGEMENT GROUP PROVIDES SCALABLE SOLUTIONS WORLDWIDE FOR INSPECTION AND SURVEILLANCE OVERSIGHT FOR CLIENT PURCHASES AND FABRICATED ITEMS.

EDG offers a range of scalable, tailored quality solutions that can be mobilized worldwide with our shop or site inspection service providers. EDG quality coordinators have extensive shop and field experience in fabrication, manufacturing, testing, and certification of materials and equipment for onshore, offshore, refinery, pipelines, processing, subsea and specialty components. The experience of our team is key in the regular discussions with vendors and engineering teams to ensure that when issues are identified, they are quickly resolved.

We are a trusted partner and travel the globe to provide quality management services to ensure materials and equipment are delivered on time and adhere to client specifications, applicable codes and standards.

# SERVICES AND CAPABILITIES

## OVERSIGHT SURVEILLANCE

EDG oversees and monitors site engineers or provides quality surveillance including resident inspectors full-time in shops or sites, intermediate ad-hoc inspections for key events, or singular final inspections of completed items for purchase signoff. Our experienced team members hold vendors and suppliers accountable to adhere to project quality requirements and industry standards. We identify key milestones within the project teams of clients, vendors, engineering, supply chain, and inspection to manage deliverables.

## PROCEDURE AND TESTING SERVICES

- Welding Procedures & Testing
  - Metallurgist and Certified Welding Inspectors
- Positive Material Identification
  - PMI Procedures & Testing
- NDT Procedures & NDE Testing
  - ASNT Level III Certified Reviewers for RT, UT, MT, PT, and VT
- Blasting & Coating Procedures
  - NACE Level III Certified Reviewers
  - Onsite Application Verifications and Documentation
- Function, Hydrostatic, Cryogenic, and Fire Safe Testing in Accordance to API, ASTM, etc. Standards
- PLC, DCS, and Software testing
  - Protocols and Documentation of Punchlists and Final Acceptance Testing
- Preservation, Packaging, Transportation, Storage Procedures, and Ongoing Preservation Monitoring

## REPORTING

We provide daily status emails to our clients and weekly formal reporting to document the status, conformance to requirements, delayed items, missing instructions, supply chain issues, manufacturing/assembly/testing progress, testing report reviews, and witnessing of key events.

## SUPPLIER QUALIFICATION AUDITS

EDG performs supplier quality audits to assess the compliance of a supplier's quality system to industry standards and client requirements.
