

A COMMITMENT TO
PEOPLE, EFFICIENCY, AND
QUALITY.

**EDG IS A FULL-SERVICE
ENGINEERING, MANAGEMENT,
AND PROJECT SUPPORT COMPANY
COMMITTED TO PEOPLE,
EFFICIENCY, AND QUALITY.**

01 PEOPLE

Our professionals are seasoned across the full spectrum of capabilities throughout the project lifecycle. Customers benefit from a generalist approach with a wider range of knowledge across key technical issues and a level of skill and experience that spans multiple industries and companies of all sizes.

02 EFFICIENCY

Our expertise – combined with our agile business model – translates to responsiveness and speed with an acute attention to detail. We anticipate issues, deliver detailed plans with the goal of mitigating risks, and keep projects moving to meet client objectives both on time and on budget.

03 QUALITY

With a culture rooted in integrity and professionalism, we look at every project as an interview for the next opportunity. We ensure the work we perform for clients is done right the first time with scalable systems and procedures to deliver the highest level of performance.

EXECUTING

**SIMPLIFY YOUR OPERATION

ENGINEERING, MANAGEMENT,
AND PROJECT SUPPORT
CAPABILITIES OF EDG.**

EXCELLENCE

As an agile, privately-owned business combined with an extensive global reach, EDG executes projects with excellence. With focus on quality, a character-driven culture, and competitive pricing, we remain committed to delivering value added fit-for-purpose solutions that foster long-lasting relationships with our customers.

PUTTING THE FOCUS ON PEOPLE FIRST

**AT EDG, WE
BELIEVE STRONG
PERFORMANCE
IS A PRODUCT
OF STRONG PEOPLE.**

We put our people first with Character by Design, our ongoing employee training program focused on 36 proven areas for creating and sustaining a better workforce. With a solid foundation for driving consistent behavior and service from every aspect of the company, EDG ensures a level of professionalism that is second-to-none along with an unrivaled commitment to doing what is in our client's best interest with the utmost degree of integrity.

“

WHAT OUR CLIENTS HAVE TO SAY ABOUT US

We ended up with a more operable design, completed under budget and ahead of schedule thanks to EDG's collaborative, creative and transparent culture.

Utilizing EDG for the topsides detailed design was one of the best decisions we made on the project. EDG brought the experience, knowledge, and vigor necessary to make the project successful.

EDG has provided engineering and operations support for our assets in the Gulf of Mexico for several years. They are responsive and produce high-quality work.

EDG did an excellent job keeping our project on target and coordinating the ever-changing outage schedule. It was a pleasure working with them.

EDG provided complete topsides engineering, procurement, construction, and offshore commissioning support for one of our recent developments. We selected them because of their substantial brownfield and subsea tieback experience and now regard EDG as one of our key partner companies.

BRINGING OUR CAPABILITIES FULL-CIRCLE FOR CUSTOMERS

EDG tailors integrated customer solutions, pairing industry expertise with budget requirements and project schedules to tackle project objectives and improve performance. We help customers reduce risk, improve safety, and save on operating costs with integrated solutions that implement new assets and optimize existing resources.

- Document Control
- Inspection and Vendor Surveillance
- Technology Services
- Regulatory and Permitting
- Instrumentation
- Commissioning and Startup
- Client Representation

WHAT WE DO BEST

EDG executes brownfield and greenfield projects in all phases of the project life cycle.

With experience working within numerous Phase Gate Systems, EDG supports your project team from early assessments through finalizing design to maintaining your operations.

• FULL DISCIPLINE ENGINEERING

EDG's integrated team is comprised of a full suite of staff engineering and design professionals ranging the full gambit of project delivery services. EDG staff has demonstrated experience from project management, execution, full detailed engineering/design, and follow on services. Our team and partners possess the technical capability to execute all scopes and phases of complex projects.

CONCEPTUAL DEVELOPMENT

FRONT-END ENGINEERING & DESIGN

DETAILED ENGINEERING

• AUTOMATION & CONTROLS TECHNOLOGY

Whether you are looking to enhance asset resiliency or move to fully autonomous operations, EDG TECH brings new value to your industrial operations through our Systems Integration, Emerging Operational Technology, Digital Twins, and Asset Performance Management Services.

• OWNER'S ENGINEERING

EDG helps clients plan and manage their projects by providing the expertise needed to support all phases of the project life cycle. Our team of professionals can help guide and execute your project or work as an extension of your team as an Owner's Engineering Representatives. We have successfully helped our clients manage their risk, negotiate on their behalf, and manage their execution plans and quality implementation.

• GREENFIELD DEVELOPMENTS

We pride ourselves in supplying cost-effective and innovative execution, engineering, design, construction management, and project services solutions for your projects. Whether acting as the owner's engineer or the design team, EDG will manage and execute your next greenfield development with excellence. EDG's team has tremendous experience in major greenfield project execution of onshore projects including upstream, chemicals, minerals, and power distribution. EDG's offshore execution spans across multiple decades and continents with an unwavering commitment to integrity and quality.

• CONSTRUCTION MANAGEMENT

EDG's construction managers will integrate your project objectives, equipment and other systems requirements into field work packages to facilitate planning and execution while managing health, safety, environmental and quality.

• BROWNFIELD MODIFICATIONS

EDG's has 40 years of successful execution in Brownfield upgrades and modifications of various sizes for on & offshore facilities. Our engineering & design teams have creative hands-on familiarity with facility expansions and debottlenecking to increase the capacity of existing infrastructure and to provide life extension complexities. We understand the complexities of executing work within an operating facility focusing on a safety, constructibility, operability, and minimizing impact to production..

• MOC PROGRAM MANAGEMENT

EDG supports many clients with their MOC Programs, Facility Optimization, Debottlenecking, and Operations Support needs. We provide the support and expertise needed for minor facility and major expansions.

EDG's office and field teams champion management of change processes. We provide the support and experience needed, handle all interfaces between operations, engineering, procurement and construction for minor modifications and major upgrades and expansions.

• PROCUREMENT & CONTRACTING

By leveraging our strong relationships in the vendor community and employing a robust procurement management work process from RFQ through award recommendation, EDG is able to provide scalable procurement solutions for both small and large projects. EDG's experience includes purchase order administration including vendor data review, quality and preservation control, logistics management and package release certification. Our contract professionals have experience in developing contracting strategies that meet our client's project objectives and risk profile while assembling and negotiating various type of simple and complex integrated contracts.

• REGULATORY & PERMITTING

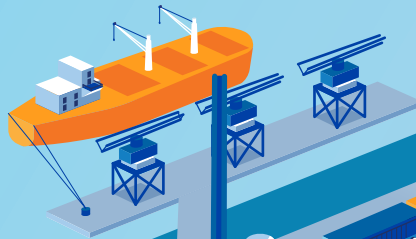

Lean on our team's expertise when it comes to federal, state, and local regulation and permitting procedures. We help our clients navigate through the regulatory requirements and standards efficiently to synchronize submittals and approvals with other project execution plans to mitigate project delays.

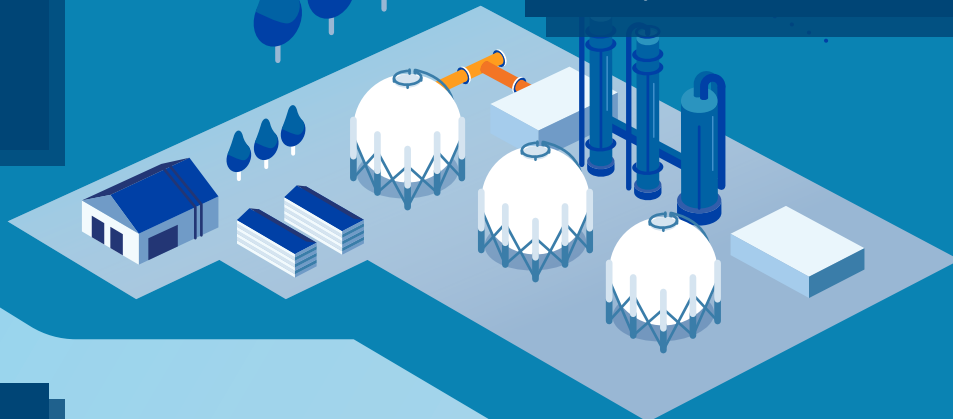

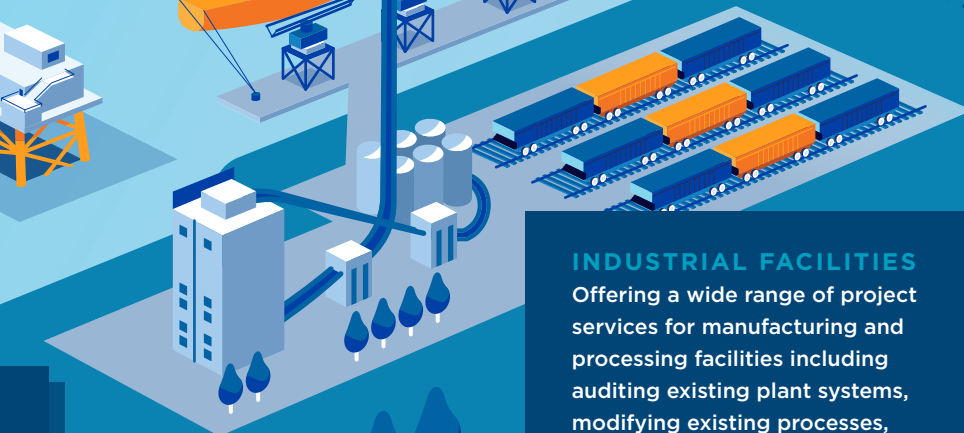

BULK MATERIAL HANDLING

Experienced and qualified structural, mechanical, electrical, and marine engineering professionals to support the unique requirements of bulk material handling projects.

INDUSTRIAL FACILITIES

Offering a wide range of project services for manufacturing and processing facilities including auditing existing plant systems, modifying existing processes, and new plant facility designs and expansion.

AUTOMATION

The technology and automation division of EDG, helping customers unlock value from the convergence of operational technology and information technology.

OIL & GAS

Supporting upstream, midstream, and downstream systems with comprehensive engineering and execution strategies to maximize your rate of return.

UTILITY SERVICES

Turnkey solutions covering all disciplines of engineering for any type of power project involving generation, transmission, and distribution.

MARINE & TERMINALS

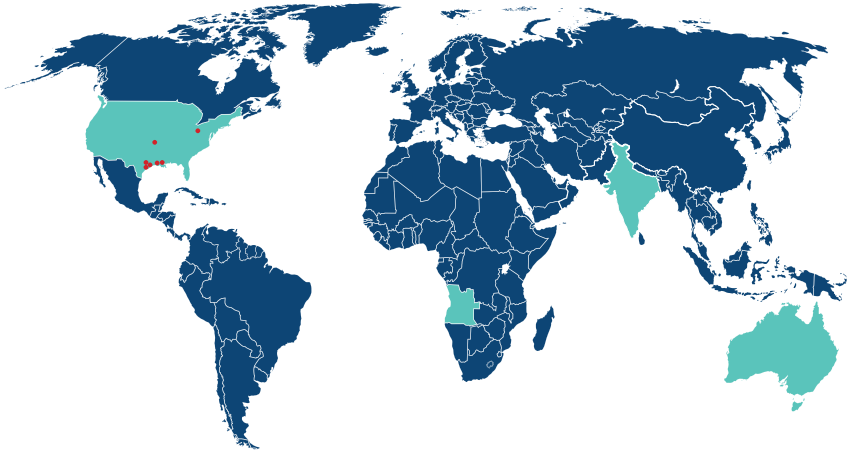

Full-service engineering planning, design, and assessment capabilities for private and public marine and terminal facilities.

INDUSTRY EXPERTISE YOU CAN LEVERAGE

EDG AT-A-GLANCE

EDG IS UNIQUELY POSITIONED TO BRING UNRIVALED COMPETITIVE EDGE TO YOUR CAPITAL AND OPERATIONS PROGRAMS WITH EXPERIENCE IN ENGINEERING, PROJECT MANAGEMENT AND PROJECT SUPPORT SERVICES.

Leveraging over 40-years of operating domestically & internationally, we draw upon our extensive knowledge to deliver the proven, innovative and value-add strategies available in the marketplace.
